

CONTENTS OF VOLUME 3

Introduction to the Series	v
Contents of the Handbook	vii
Preface to the Handbook	xi

Chapter 27

Recent Developments in the Theory of Regulation	
MARK ARMSTRONG AND DAVID E.M. SAPPINGTON	1557
Abstract	1560
Keywords	1560
1. Introduction	1561
2. Optimal monopoly regulation	1562
2.1. Aims and instruments	1562
2.2. Regulation with complete information	1564
2.3. Regulation under adverse selection	1566
2.4. Extensions to the basic model	1581
2.5. Dynamic interactions	1591
2.6. Regulation under moral hazard	1599
2.7. Conclusions	1605
3. Practical regulatory policies	1606
3.1. Pricing flexibility	1609
3.2. Dynamics	1617
3.3. The responsiveness of prices to costs	1627
3.4. Regulatory discretion	1631
3.5. Other topics	1636
3.6. Conclusions	1639
4. Optimal regulation with multiple firms	1640
4.1. Yardstick competition	1641
4.2. Awarding a monopoly franchise	1645
4.3. Regulation with unregulated competitive suppliers	1651
4.4. Monopoly versus oligopoly	1655
4.5. Integrated versus component production	1661
4.6. Regulating quality with competing suppliers	1667
4.7. Conclusions	1668
5. Vertical relationships	1669
5.1. One-way access pricing	1669

5.2. Vertical structure	1679
5.3. Two-way access pricing	1681
5.4. Conclusions	1684
6. Summary and conclusions	1684
Acknowledgements	1687
References	1687

Chapter 28

The Economic Analysis of Advertising

KYLE BAGWELL	1701
Abstract	1703
Keywords	1703
1. Introduction	1704
2. Views on advertising	1708
2.1. Setting the stage	1708
2.2. The persuasive view	1710
2.3. The informative view	1716
2.4. The complementary view	1720
2.5. Summary	1723
3. Empirical regularities	1725
3.1. The direct effects of advertising	1726
3.2. The indirect effects of advertising	1734
3.3. Summary	1748
4. Monopoly advertising	1749
4.1. The positive theory of monopoly advertising	1749
4.2. The normative theory of monopoly advertising	1753
4.3. Summary	1761
5. Advertising and price	1762
5.1. Homogeneous products	1762
5.2. Differentiated products	1766
5.3. Non-price advertising	1769
5.4. Loss leaders	1772
5.5. Summary	1773
6. Advertising and quality	1774
6.1. Signaling-efficiency effect	1774
6.2. Repeat-business effect	1779
6.3. Match-products-to-buyers effect	1783
6.4. Quality-guarantee effect	1786
6.5. Summary	1791
7. Advertising and entry deterrence	1792
7.1. Advertising and goodwill	1792
7.2. Advertising and signaling	1798
7.3. Summary	1802

8. Empirical analyses	1803
8.1. Advertising and the household	1803
8.2. Advertising and firm conduct	1808
8.3. Summary	1813
9. Sunk costs and market structure	1813
9.1. Main ideas	1814
9.2. Econometric tests and industry histories	1818
9.3. Related work	1819
9.4. Summary	1821
10. New directions and other topics	1821
10.1. Advertising and media markets	1821
10.2. Advertising, behavioral economics and neuroeconomics	1825
10.3. Other topics	1827
10.4. Summary	1828
11. Conclusion	1828
Acknowledgements	1829
References	1829

Chapter 29

Empirical Models of Entry and Market Structure

STEVEN BERRY AND PETER REISS	1845
Abstract	1847
Keywords	1847
1. Introduction	1848
1.1. Why structural models of market structure?	1849
2. Entry games with homogeneous firms	1851
2.1. A simple homogeneous firm model	1851
2.2. Relating V to the strength of competition	1853
2.3. Observables and unobservables	1859
2.4. Demand, supply and endogenous N	1860
3. Firm heterogeneity	1863
3.1. Complications in models with unobserved heterogeneity	1864
3.2. Potential solutions to multiplicity	1867
3.3. Applications with multiple equilibria	1873
3.4. Imperfect information models	1877
3.5. Entry in auctions	1882
3.6. Other kinds of firm heterogeneity	1883
3.7. Dynamics	1883
4. Conclusion	1884
References	1884

Chapter 30

A Framework for Applied Dynamic Analysis in IO

ULRICH DORASZELSKI AND ARIEL PAKES

	1887
Abstract	1889
Keywords	1889
1. Introduction	1890
2. Model	1892
3. Equilibrium	1901
3.1. Existence	1902
3.2. Characterization	1903
3.3. Multiplicity	1905
4. Introduction to computation	1908
4.1. Gaussian methods	1908
4.2. Computational burden	1915
4.3. Equilibrium selection	1916
5. Alleviating the computational burden	1918
5.1. Overview	1918
5.2. Continuous-time models	1920
5.3. Stochastic approximation algorithm	1926
5.4. Function approximation methods	1937
5.5. Oblivious equilibrium	1938
6. Computing multiple equilibria	1939
7. Applications and extensions	1943
7.1. Empirics	1945
7.2. Capacity and advertising dynamics	1947
7.3. Mergers	1950
7.4. Learning-by-doing and network effects	1952
7.5. Collusion	1955
8. Topics for further study	1957
9. Conclusions	1961
Acknowledgements	1961
References	1962

Chapter 31

Coordination and Lock-In: Competition with Switching Costs and Network Effects

JOSEPH FARRELL AND PAUL KLEMPERER

	1967
Abstract	1970
Keywords	1970
1. Introduction	1971
1.1. Switching costs	1972
1.2. Network effects	1974
1.3. Strategy and policy	1976
2. Switching costs and competition	1977

2.1. Introduction	1977
2.2. Empirical evidence	1980
2.3. Firms who cannot commit to future prices	1981
2.4. Firms who cannot discriminate between cohorts of consumers	1983
2.5. Consumers who use multiple suppliers	1990
2.6. Battles for market share	1996
2.7. Entry	1998
2.8. Endogenous switching costs: choosing how to compete	2001
2.9. Switching costs and policy	2005
3. Network effects and competition	2007
3.1. Introduction	2007
3.2. Empirical evidence	2009
3.3. Under-adoption and network externalities	2016
3.4. The coordination problem	2021
3.5. Inertia in adoption	2028
3.6. Sponsored price and strategy for a single network	2036
3.7. Sponsored pricing of competing networks	2041
3.8. Endogenous network effects: choosing how to compete	2047
3.9. Network effects and policy	2052
4. Conclusion	2055
Acknowledgements	2055
References	2056

Chapter 32

An Empirical Perspective on Auctions

KEN HENDRICKS AND ROBERT H. PORTER 2073

Abstract 2075

Keywords 2075

1. Introduction 2076

2. Model and notation 2079

3. Structural analysis of second-price auctions 2083

3.1. Theory 2083

3.2. Estimation 2086

3.3. Identification 2092

4. Structural analysis of first price auctions 2095

4.1. Theory 2095

4.2. Estimation 2097

4.3. Identification 2102

5. Tests of private versus common values 2104

6. Tests of the theory 2108

6.1. Pure common value auctions 2109

7. Revenues and auction design 2115

7.1. Multi-unit auctions 2119

8. Collusion	2122
8.1. Collusive mechanisms	2122
8.2. Enforcement	2127
8.3. Detection	2129
8.4. Collusion by sellers	2133
9. Further research issues	2133
9.1. Scoring rules	2133
9.2. Entry and dynamics	2134
Acknowledgements	2138
References	2138

Chapter 33

A Primer on Foreclosure

PATRICK REY AND JEAN TIROLE

2145

Abstract

2147

Keywords

2147

1. Introduction	2148
1.1. What is foreclosure?	2148
1.2. Remedies	2151
1.3. Roadmap	2153
2. Vertical foreclosure	2155
2.1. A simple framework	2158
2.2. Restoring monopoly power: vertical integration	2170
2.3. Restoring monopoly power: exclusive dealing	2176
2.4. Further issues	2178
3. Horizontal foreclosure	2182
3.1. Entry deterrence in the tied market	2184
3.2. Protecting the monopolized market	2188
3.3. Innovation by the monopoly firm in the competitive segment	2191
3.4. Summary	2194
4. Exclusive customer contracts	2194
4.1. Exclusionary clauses as a rent-extraction device	2195
4.2. Scale economies and users' coordination failure	2198
4.3. Summary	2200
5. Potential defenses for exclusionary behaviors	2201
5.1. Efficiency arguments for (vertical) foreclosure	2201
5.2. Efficiency arguments for tying	2203
6. Concluding remarks	2204
Appendix A: Private incentives not to exclude	2206
A.1. The protection of downstream specific investment: the 1995 AT&T divestiture	2206
A.2. Protecting upstream investment through downstream competition	2209
Appendix B: Excessive entry and vertical foreclosure	2210
Appendix C: Vertical foreclosure with Bertrand downstream competition	2211

Vertical integration	2214
References	2215

Chapter 34

Price Discrimination and Competition

LARS A. STOLE	2221
---------------	------

Abstract	2223
----------	------

Keywords	2223
----------	------

1. Introduction	2224
-----------------	------

2. First-degree price discrimination	2229
--------------------------------------	------

3. Third-degree price discrimination	2231
--------------------------------------	------

3.1. Welfare analysis	2231
-----------------------	------

3.2. Cournot models of third-degree price discrimination	2233
--	------

3.3. A tale of two elasticities: best-response symmetry in price games	2234
--	------

3.4. When one firm's strength is a rival's weakness: best-response asymmetry in price games	2239
---	------

3.5. Price discrimination and entry	2244
-------------------------------------	------

3.6. Collective agreements to limit price discrimination	2246
--	------

4. Price discrimination by purchase history	2249
---	------

4.1. Exogenous switching costs and homogeneous goods	2251
--	------

4.2. Discrimination based on revealed first-period preferences	2254
--	------

4.3. Purchase-history pricing with long-term commitment	2257
---	------

5. Intrapersonal price discrimination	2259
---------------------------------------	------

6. Non-linear pricing (second-degree price discrimination)	2262
--	------

6.1. Benchmark: monopoly second-degree price discrimination	2264
---	------

6.2. Non-linear pricing with one-stop shopping	2267
--	------

6.3. Applications: add-on pricing and the nature of price-cost margins	2275
--	------

6.4. Non-linear pricing with consumers in common	2277
--	------

7. Bundling	2281
-------------	------

7.1. Multiproduct duopoly with complementary components	2282
---	------

7.2. Multiproduct monopoly facing single-product entry	2284
--	------

8. Demand uncertainty and price rigidities	2286
--	------

8.1. Monopoly pricing with demand uncertainty and price rigidities	2288
--	------

8.2. Competition with demand uncertainty and price rigidities	2290
---	------

9. Summary	2292
------------	------

Acknowledgements	2292
------------------	------

References	2292
------------	------

Chapter 35

Market Structure: Theory and Evidence

JOHN SUTTON	2301
-------------	------

Abstract	2303
----------	------

Keywords	2303
----------	------

1. Introduction	2304
-----------------	------

1.1. The bounds approach	2304
1.2. Scope and content	2306
2. The cross-industry literature	2306
2.1. Background: the Bain tradition	2306
2.2. Some preliminary examples	2309
2.3. A theoretical framework	2315
2.4. The price competition mechanism	2319
2.5. The escalation mechanism	2321
2.6. Markets and submarkets: the R&D vs concentration relation	2333
3. The size distribution	2342
3.1. Background: stochastic models of firm growth	2343
3.2. A bounds approach to the size distribution	2344
3.3. The size distribution: a game-theoretic approach	2346
3.4. The size distribution: empirical evidence	2349
4. Dynamics of market structure	2354
4.1. Dynamic games	2354
4.2. Learning-by-doing models and network effects	2355
4.3. Shakeouts	2356
4.4. Turbulence	2356
5. Caveats and controversies	2358
5.1. Endogenous sunk costs: a caveat	2358
5.2. Can ‘increasing returns’ explain concentration?	2358
5.3. Fixed costs versus sunk costs	2359
6. Unanswered questions and current research	2359
Acknowledgements	2362
Appendix A: The Cournot example	2362
Appendix B: The Cournot model with quality	2363
References	2364

Chapter 36

Antitrust Policy toward Horizontal Mergers

MICHAEL D. WHINSTON

2369

Abstract

2371

Keywords

2371

1. Introduction	2372
2. Theoretical considerations	2373
2.1. The Williamson trade-off	2373
2.2. Static (“unilateral”) effects of mergers	2375
2.3. Mergers in a dynamic world	2383
3. Merger laws and enforcement	2389
3.1. U.S. merger laws and the DOJ/FTC guidelines	2390
3.2. Merger control in the E.U.	2397
3.3. Differences across other countries	2401

3.4. Enforcement experience	2404
4. Econometric approaches to answering the <i>Guidelines</i> ' questions	2405
4.1. Defining the relevant market	2405
4.2. Evidence on the effects of increasing concentration on prices	2411
5. Breaking the market definition mold	2415
5.1. Merger simulation	2415
5.2. Residual demand estimation	2418
5.3. The event study approach	2421
6. Examining the results of actual mergers	2424
6.1. Price effects	2425
6.2. Efficiencies	2433
7. Conclusion	2435
Acknowledgements	2436
References	2436
